

Developing Masterplan for External Bids for Funds:

The new Sports Pavilion building would be positioned centrally to allow maximum visibility of the park surrounds, so parents or carers could watch over children at play while sitting in shade, and with a kiosk it makes for a destination point. An Eco-friendly building would mean low utilities bills. Additionally the veranda enables stalls to be set up for fetes and boot fairs. The options of elements below will be designed in response to identified priorities via survey and Community Design Days:

- Tennis Courts re-build due to subsidence
- Pavilion Changing Room space for all
- Play area improvements and Fence
- Improved Park perimeter Fence and associated landscaping and access improvements
- Existing Toilets re-vamp

This is an ambitious community resource improvement proposal that will need a professional feasibility study to identify costs and potential funding sources

Murray Park Friends draft improvements ideas include a number of options that will need Community Design input to finalise

We want to get the ideas of as many as possible people who use the Park - the Friends will be delivering surveys in a circle ten minutes walk from the Park. Tell us your views, please use the survey posted through your door, and return to Murrayside Community Centre.

Thank you.
